The Global Ministries EarthKeepers program trains United Methodists in the United States to start and grow environmental projects in their churches & communities. Our work is rooted in eco-theology, anti-racism, community organizing & project planning to implement meaningful environmental justice projects.

This private community serves as a platform for current & past EarthKeepers to connect, network, engage & collaborate in order to strengthen Creation Care & environmental justice work being done by EarthKeepers in their communities.

There are lots of ways to utilize this group as an EarthKeeper. You will find updates about the program, resources from past trainings, and project plans. We encourage you to connect with other EarthKeepers, launch questions via the livefeed and forums, and share as much as possible about the work you are doing in your community!

We invite you to create a project on the "Projects" tab and share your work with the greater network.

If you have any questions on how to use this platform, or about anything related to EarthKeepers, reach out to Zaira Henry zhenry@umcmmission.org.
